PROFESSIONAL EXPERIENCE

Abaci Technologies Pvt Ltd. Calicut, Kerala, India
Frontend Developer | 2023 - Present

- Designed and developed responsive, user-focused web interfaces using modern frontend technologies.
- Translated UX/UI designs into interactive web pages, ensuring seamless user experiences.
- Integrated APIs to enable dynamic, data-driven functionality across web applications.
- Conducted performance optimization to improve website speed and responsiveness.
- Implemented thorough testing and debugging to deliver high-quality, bug-free frontend solutions.
-

Projects

- **The Workbook** :- Built a co-working firm's web application with an intuitive interface for managing workspaces .
- **Zaair** :- Designed a visitor management application for secure and user-friendly access.
- **AbaciCount** :- Developed the frontend for a people-counting system powered by camera data, ensuring accurate occupancy displays.
- **NMDC Bus Attandance System**:- The NMDC Bus Attendance System is a specialized software solution designed to manage and streamline the transportation services for the NMDC group. The system ensures that only authorized employees of NMDC can access and utilize the bus services.
- **Parking Management System** :- The Parking Management System is a comprehensive software solution designed to efficiently manage parking slots and regulate access based on the credentials of office or building-authorized personnel. The system ensures seamless parking operations while enhancing security and user convenience.
- **ERP Software** :- Developed and implemented a customized ERP software solution to streamline and integrate core business processes for enhanced efficiency and collaboration. The system featured modules for Finance, HR, Inventory Management, CRM, and Project Management, ensuring seamless operations across departments..
